Art Unit: 2811

1. The amendment filed 1/24/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "Based on the description provided herein, it would also be evident to one of skill in the art to substitute MOS-on-PWELL devices for the MOS-on-NWELL devices and NMOS transistors for the PMOS transistors."

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification never discloses the connection among the first MOS-on-PWELL device, the second MOS-on-PWELL device, the first NMOS transistor and the second NMOS transistor (i.e., the first gate, the second pickup terminal, the gate of the first NMOS transistor and the source and drain terminals of the second NMOS transistor are connected to a first common terminal, and wherein the second gate, the first pickup terminal, the gate of the second NMOS transistor and the source and drain terminals of

the first NMOS transistor are connected to a second common terminal.) as claimed in claim 7.

4. Applicant's arguments filed 1/24/06 have been fully considered but they are not persuasive.

It is urged, in pages 7-8 of the remarks, that original claims 7 and 9, and paragraph 21 of the specification disclose the connection among the first MOS-on-PWELL device, the second MOS-on-PWELL device, the first NMOS transistor and the second NMOS transistor as claimed in claim 7. However, none of original claims 7 and 9, and paragraph 21 of the specification disclose the first gate, the second pickup terminal, the gate of the first NMOS transistor and the source and drain terminals of the second NMOS transistor are connected to a first common terminal, and wherein the second gate, the first pickup terminal, the gate of the second NMOS transistor and the source and drain terminals of the first NMOS transistor are connected to a second common terminal as claimed in claim 7.

Although original claim 7 discloses a combination of the first and second NMOS transistors are connected in parallel with the first and second MOS-on-PWELL devices, original claim 7 never discloses the detail connection among the first MOS-on-PWELL device, the second MOS-on-PWELL device, the first NMOS transistor and the second NMOS transistor as claimed in claim 7.

5. Claim 2 is allowed.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
